## HOW TO MAKE A REFERRAL

Anyone can initiate a referral to Advanced Specialty Hospital of Toledo. Our clinical liaison will complete an on-site screening to determine the patient's medical needs. Transfers often occur the same day.

## ADMISSIONS

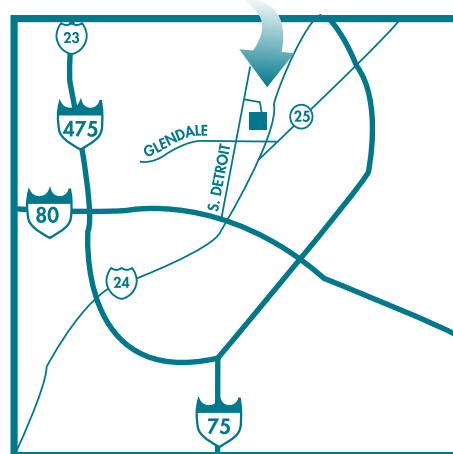

### Who is Eligible to become a patient at Advanced Specialty Hospital of Toledo?

We accept patients that are 18 years of age and older with various medical conditions and physical disabilities. Patients are typically referred to Advanced Specialty Hospital of Toledo by their physician, nurse, case manager, social worker, family member, physicians office, skilled nursing facilities, home health care, or from home, and in most cases coming from a hospital-based intensive care unit.

Upon approval for admission, a clinical evaluation is conducted by the Advanced Specialty Hospital of Toledo team. Our services are covered in full or in part through Medicare or many health maintenance organizations, insurance companies, or state approved health plans. While there may be charges not covered by your insurance, it is best to check your individual policy for specific benefits. Our team will secure insurance pre-certifications and check hospital level of care benefits prior to admission.

*Admissions Accepted 24 hours a day, 7 days a week*

## ABOUT US

Advanced Specialty Hospital of Toledo is a 40-bed Long Term Acute Care Hospital (LTACH- pronounced L-tack) providing care for patients that are medically complex, stable, and require an extended hospitalization. Patients are regularly admitted from the short-term acute care hospital when they are no longer the most appropriate or cost-effective setting for the patient. We regularly admit patients from hospital Intensive Care Units, Step down Units, or Cardiac Units. The Advanced Specialty Hospital of Toledo is proud to be Accredited by the Joint Commission, licensed by the state of Ohio and Medicare Certified to give our patients the highest quality of care.

Our patients benefit from the unique, state of the art LTACH environment which provides for the patient's acute medical care in a professional, university quality environment which maximizes patient's recovery options. LTACH care differs from nursing homes and subacute care in many ways. Our patients are medically complex requiring daily physician visits, critical care ACLS trained nurses, respiratory therapists, pharmacists, dietitians, social workers, discharge planners, dialysis technicians, and physical therapists, occupational therapists, and speech language pathologists.

## LONG-TERM ACUTE CARE HOSPITAL (LTACH)

LTACH Hospitals fill an important role in the continuum of patient care and address the needs of a small, but growing, patient population who cannot be effectively treated in the conventional healthcare setting.

## PROVIDING SPECIALTY CARE PROGRAMS

Our specialized treatment programs include treating the whole person through a well-planned aggressive integrated program of medical and therapeutic care.

*Our programs include:*

### The Pulmonary/Ventilator Program

This provides patients with respiratory failure the opportunity to be successfully weaned from ventilator dependence and achieve their highest functioning level. Because of the continuity of care over an extended period of time, many of our patients can return home breathing on their own.

### Medically Complex Program

Patients receive integrated treatment for more than one condition, including life-support services that can include telemetry, potential nutritional support, cardiac and respiratory monitoring, and dialysis.

### Complex Wound Program

Patients with pressure ulcers, serious wound complications or who are recovering from extensive surgery receive specialized treatment through this program.

## SERVICES OFFERED

LTACH's provide care for patients that have an average length of stay greater than 25 days. Diagnoses that may benefit from the level of care that LTACH's provide include but are not limited to:
