We are pleased to share another wonderful rehab success story from:

Advanced Specialty Hospitals of Toledo
1015 Garden Lake Parkway, Toledo Ohio 43614
(419) 381-0037

On September 8, Mark experienced chest pain and found himself in the emergency room. He had had a heart attack and was admitted to the hospital. While in the short term hospital, Mark experienced more complications and difficulty breathing. He required the use of a ventilator, hemodialysis, and a feeding tube to stabilize his condition.

Mark came to us at Advanced Specialty Hospitals on October 20th, 2022. He was very weak from his long hospitalization and illness. He no longer required the ventilator, but he had to work with the respiratory team to improve his breathing. Initially, he needed help to get out of bed, walk in his room, get dressed, and care for himself. Mark worked with the physical, occupational and speech therapists to improve his strength and independence.

Following 25 days in our care, Mark was able to return home with his wife and family. By the time he was ready to go home, he was able to walk around the hospital and breathe independently without distress. Thank you for letting us be a part of your recovery!

Functional Outcome Measures
